

Herbal Medicine

Chinese herbal medicine may be prescribed to support healing and whole body wellness. If you are interested in using this modality, herbal medicine may be prescribed on your first visit or any follow-up visit. Powdered and tablet herbs from quality herb manufacturers are available for purchase at the clinic. Herbs in this form are safe, convenient and easy for patients to take. Some of the herbal formulas that we prescribe can only be obtained through a licensed acupuncturist, while others can be bought at retail stores without a license. For your convenience, we carry both types of herbs. For safety reasons, we can only sell herbs to patients who have received their herbal prescription from a licensed acupuncturist at our clinics.
